# terested in Making Homes TOMATO DISEASES

PECULIAR TO VIRGINIA "it seems advisable at this time," says W. E. Thomas, assistant in plant pathology and bacteriology of the Virginia experiment station, "to call the attention of tomato growers in Virginia to some of the most important diseases which are usually observed in this During recent years tomate blights and rots have become so so rious a problem as to cause a considthe culture of tomatoes entirely. While control measures have been worked out to a fair degree of satisfaction, these diseases are still formidable enemies of the tomato growing industry There are three diseases of sufficient

economic importance to be carefully considered. There are a number of important troubles which occur ocally in less vigorous forms. Black spot, or rust (macrosporium).

is more common in the States further sometimes ruining entire crops not uncommon in Virginia and been reported as widespread in Botetourt County. This is a true leaf which later show concentric rings. snots often become one-fourth inch or in diameter. They may coalese cause the margin and tip of th leaf to curl up. The lower leaves are early blight, or leaf spot (sep-

toria) is more common and more structive in Virginia. Like the black spot, it attacks the lower leaves first, and may continue upward until practically all the leaves have shrivelled. The leaf first shows small dark spots which later become light in the center. The spots rarely become as large as small pea. No concentric marking is a small pea. No concentric marking is a small pea. No concentric marking is a wery important to the farmer and fruit growers water to make fifty gallons of lime in another barrel. Add water to make fifty gallons of lime in another barrel. Add water to make fifty gallons of lime in another barrel and pounds of lime in another barrel. the stem for some time. The two diseases just described usually appear seases just described usually appear about the middle of July and last until cool weather. Warm, wet weather is to favorable to their development.

The late blight or downy mildew (phytophthora) is the most does not usually appear until the part of July. This is a more blight, attacking leaves, fruit latter part of July. and stems, and causing death quickly. The fungus usually attacks the tip the leaf and works inward, giving it the appearance of having been frost-When dry, it is brownish; when wet, it is almost black, often showing tions.

Home-Made Bordeaux Mixture.

Get the following states.

Cutworms.

Cutworms are the larvae of the owlet moths. Like the moths, they work at night and hide in the daytine about an inch below the surface of the ground, under some protecting material. Cutworms are especially injurious to crops following sod and in gardens. They do most damage by cutting off the plants just above the ground.

Cutworms are the larvae of the owlet timers. Mix the Bordeaux as needed and apply at once. It is never so good after it has settled.

Every one who uses Bordeaux mixture frequently and in quantity will find it convenient to keep concentrated stock solutions on hand, as these keep needed and apply at once. It is never so good after it has settled.

# **WOMEN TO DECIDE ON PART** IN COMING CAMPAIGN

Suffrage Leaders, Militants and Pacifists Will Meet in Conference at Colorado Springs.

FIGHT FOR EQUAL SUFFRAGE

Whether Support to Democratic, Republican or Progressive Parties Will Be Decided at Gathering to Be Held August 10-12.

WASHINGTON, July 30 .- Woman's part in the forthcoming presidential campaign in the movement for equal suffrage, promising the most active participation of women in national politics in American history, will be planned when woman suffrage leaders, militants and pacifists, meet at Colorado Springs for a three-day confer-August 10-12. The conference will consider what policy the new suffrage party organized last June at Chicago, shall adopt in the coming campaign to secure submission to the States by Congress of a national suffrage constitutional amendment.

Whether support to the Democratic, Republican or Progressive parties will be given by women favoring a national suffrage amendment, leaders here de- troit, Mich. clare, will be definitely decided at the Colorado Springs conference. While the conference called is primarily for officers and leaders in the suffrage campaign, it is expected that hundreds of women of the rank and file of suffrage workers will attend.

Miss Anne Martin, of Nevada, chairman of the Woman's pacty, will preside, and addresses will be made by many women prominent in the suffrage

propaganda. Plans have already been completed for the campaign of the Woman's party quarters will be at Chicago, in charge of Miss Martin.

A campaign fund, which is expected to reach the \$500,000 mark, is also being collected by Mrs. O. H. P. Belmont, of New York. State campaign managers have been selected and a large array of stump speakers chosen. Each will tour all of the suffrage States. Mrs. not at war.
